[TASK] Restructure form setup

The setup of the "form" extension has been restructured. For each validator, form element, and finisher separate files are available.

In addition, inheritances have been resolved, which makes existing mixins obsolete. In a subsequent change these mixins will be deprecated as these were actually meant for internal use only but could be used by 3rd party extensions.

Due to this change, integrators can easily understand how form objects are defined.

Resolves: #84221

Resolves: #84203

Releases: master
