[FEATURE] Extbase-based Frontend Login Form

A new Extbase-based plugin is added to TYPO3's Extension "felogin" which can be used as a toggle with custom templates based on Fluid, instead of marker-based templates.

A new feature toggle is added to the Settings module for Site Administrators to switch to the newly added felogin extbase plugin, or continuing using the pibase plugin, e.g. for upgrading purposes.

Revision 7e6ece1d - 2019-12-03 11:48 - Benni Mack

[BUGFIX] Cleanup new frontend login form

Some changes were made:

- Upgrade Wizard works
- Visibility on RedirectHandler is sorted out
- TreeUidListProvider is removed - cObject does everything already, less dependencies
- PasswordChangeEvent is actually executed now (and works!)
- RedirectConfiguration now has a factory
- Do not use ConnectionPool as dependency as it contains state
- Most "final" and "private" were put back to "protected" (as the rest of core) - except events
- Additional hmac check in Repository
- Add lifetime validation of hash in changePassword action as well
