Revision 42509bf9 - 2018-03-15 20:29 - Saskia Schreiber

[TASK] Use ServerRequestInterface in ContentElement/ElementInformationController

This patch changes the ElementInformationController to consistently use the ServerRequestInterface object instead of GeneralUtility for the retrieval of POST/GETvars and server environment variables.

Also, to prepare for refactoring in v10, all public properties and methods except mainAction() will throw a deprecation notice if called.

Resolves: #84284

[BUGFIX] Error in record info when displaying references

This fixes the regression introduced in task #84284 (PSR-7 rewrite of ElementInformationController).

getRecordActions() expects the full request as third parameter, not the requestUri parameter.
