[TASK] Use ServerRequestInterface in Wizard/EditController

This patch changes the EditController to consistently use ServerRequestInterface instead of GeneralUtility and HttpUtility.

The method main() is kept to keep this change non-breaking, it translates the given response objects back to strings/redirects which match existing behaviour.

Also, to prepare for refactoring in v10, main() and the new protected properties will throw a deprecation notice if called.

Resolves: #84327
Releases: master
