Description			
Hello there,			
It should be made possible to add a page link within the "Static Text" Element.			
Example for a GDPR/DSGVO compliant form: https://www.e-recht24.de/kontakt.html			
Line: "Detaillierte Informationen zum Umgang mit Nutzerdaten finden Sie in unserer Datenschutzerklärung". => "Datenschutzerklärung" is required to be a link.

History

#1 - 2018-03-27 07:39 - Georg Ringer

- Subject changed from Form Change for DSGVO compliance required. to Form Change for GDPR/DSGVO compliance required.
- Description updated

#2 - 2018-04-02 17:51 - Bjoern Jacob

- For now, one can use this small extension to achieve the desired output: https://github.com/tritum/form_element_linked_checkbox
- We can discuss if such a form element should be shipped with the core.

#3 - 2018-04-10 13:39 - Georg Ringer

- Subject changed from Form Change for GDPR/DSGVO compliance required. to Allow HTML inside the form element "static text"

#4 - 2018-04-18 14:13 - Georg Ringer

- Parent task set to #84776

#5 - 2018-09-21 09:48 - Riccardo De Contardi

I think that these feature requests are somehow related as they suggest alternative solutions for this same problem:

<https://forge.typo3.org/issues/84849>

<https://forge.typo3.org/issues/85137>

#6 - 2018-09-23 13:17 - Bjoern Jacob

- Is duplicate of Feature #84849: Allow links and some HTML tags in label, description, static text, validators, and emailBody added

#7 - 2018-09-23 13:17 - Bjoern Jacob

- Status changed from New to Closed

Let's continue working on [#84849](#). We have a POC and know what to do but cannot achieve it for v9. This should come with v10.

#8 - 2019-09-19 00:49 - Julian Stock

- File `datenschutz.png` added

As a workaround, I wrote the form config in a yaml file

```
label: 'Ich habe die <a href="/datenschutz/" target="_blank">Datenschutzbestimmungen</a>
gelesen und akzeptiert.'
```

and used my own `Checkbox.html` partial of the form extension with the following addition:

```
<f:format.raw>{formvh:translateElementProperty(element: element, property: 'label')}</f:format.raw>
```

Ich habe die **Datenschutzbestimmungen** gelesen und
akzeptiert. *
