Description

Hello, i am using TYPO3 sys_category - i have 20,000 items in one category. Every time i want to edit this category (in BE) it opens very slow 1-2 minute waiting. The problem is in section "Items" where all items of that category are listed in one page. Possible fix - paginator? (list only 50 records/items on one page).

Maybe if the "items" field is not useful when you edit the category, you can "hide" it with tsconfig?
This will speed up the rendering time of the TCEFORM.
