<b>Has patch:</b> No	

**Description**

It should be possible to write settings using the ConfigurationManager, similar to PackageStates.yaml.

Rules:

- constants that have been replaced upon reading should be reversed when writing
- never write changes from a context to global settings
- always write global settings

The last rule assumes that settings changes done through some interface are supposed to affect global settings, context specific changes are done manually.

Question: is this a valid assumption?

#### History

##### #1 - 2010-10-14 16:03 - Karsten Dambekalns

- File 8464-write-settings.diff added

Attached some code that belongs to this issue but had been committed in error with [6ea6e8d283e5ac5bafb5aa4817cd765f06504f1c](#)

##### #2 - 2011-12-15 17:06 - Karsten Dambekalns

- Status changed from Needs Feedback to New

- Assignee deleted (Karsten Dambekalns)

- Has patch set to No
