**Description**

**Scenario**  
We have a big file structure for a clinic website with 10 levels and long names.

**Problem**  
Some filemounts can not work because the length of the path is truncated.

**ToDo**  
Increase the sys\_filemounts.path to 255 chars

Hint: We would use the ticket to bring our colleagues into the contribution workflow. That's why the ticket is assigned to me.
