Description <p>Every websites benefits from a good SEO and therefor I think it is good to have some extra options in the core. At the moment there are several extensions adding properties to pages to make it possible to set some meta tags for Search Engine Optimization. By adding this to core, we help TYPO3 to provide more SEO options out of the box.</p> <p>The fields that should be added to TCA (without a "special" function)</p> <ul style="list-style-type: none">• SEO title => just an input field• robot instructions => two fields: on "Index this page" and "Follow this page". This should be the new toggle feature• OpenGraph-tags => 1 input field title, a textarea for description and a image field• Twitter-tags => 1 input field title, a textarea for description and a image field <p>This should be done in page properties on a new tab called SEO. Also the description field (that is now on the Metadata tab) needs to be moved to the SEO tab.</p> <p>If you have any question, please ask Richard Haeser</p> <p>See https://decisions.typo3.org/t/include-some-basic-seo-options-to-core/289</p>

[FEATURE] Add SEO fields to Pages TCA

This feature adds some new SEO fields to the Pages TCA. It also introduces a new SEO tab containing all SEO related meta data. The description field is moved to this tab. Other meta data that is not important for SEO, is still on the Metadata tab.

Resolves: #84798

Releases: master
