Description

Yesterday I tried upgrading a TYPO3 install which excluded E_USER_DEPRECATED in [SYS][exceptionalErrors]. This led to an uncaught exception in frontend, backend and install tool and I had to change the setting manually in my configuration.

If this happens for people during an upgrade it would be cool if the install tool would at least still work.

The exception is thrown in: Utility/ExtensionManagementUtility.php:1714

```
        if (!empty($messages)) {
            $context =
'Automatic TCA migration done during bootstrap. Please adapt TCA accordingly, these migrations'
            .
' will be removed. The backend module "Configuration -> TCA" shows the modified values.'
            . ' Please adapt these areas:';
            array_unshift($messages, $context);
            trigger_error(implode(LF, $messages), E_USER_DEPRECATED);
        }
```

Just tried it again (value 28674) and typo3/ and typo3/install do not work, accessing the install tool via typo3/install.php does work.

Revision f6455976 - 2018-04-21 14:26 - Helmut Hummel

[BUGFIX] Always exclude E_USER_DEPRECATED from exceptionalErrors

There is a limited use case for exceptions to be thrown on deprecation messages. To ease the upgrade path to TYPO3 9 and to not allow "accidental" configuration that breaks the system, deprecation messages will never throw exceptions.

Users with other use cases, can still implement and configure their own exception handler.

Resolves: #84802
