

TYPO3 Core - Epic #84914

Epic # 83932 (New): Initiative: Datahandler & Persistence

Streamline entity configuration layer

2018-05-03 14:08 - Oliver Hader

Status:	New	Start date:	2018-05-03
Priority:	Should have	Due date:	
Assignee:		% Done:	0%
Category:	DataHandler aka TCemain	Estimated time:	0.00 hour
Target version:			
Sprint Focus:			
Description			
<p>Entity configuration in TYPO3 is done by using TCA (table configuration array). Currently the interpretation of e.g. "what is a 1:n composition (IRRE)" is spread over multiple locations - most importantly to mention are DataHandler, Extbase and FormEngine - but there are much more.</p> <p>In order to avoid individual (and possible) different interpretation of entity definitions and features and generic configuration shall be introduced to provide access to the semantics of TCA and FlexForm data structures.</p>			
Subtasks:			
Story # 84915: Provide generic entity schema definition			New
Story # 84916: Provide generic entity relationship model			New
Story # 84917: Make use of schema definition & relationship layer			New
