Target version:		Tags:	
TYPO3 Version:	9	Sprint Focus:	
PHP Version:			
Description			
Expected goal			
<pre>\$factory = new TcaSchemaDefinitionFactory(\$GLOBALS['TCA']); \$schemaDefinition = \$factory->buildForTable('tt_content'); \$service = new SchemaDefinitionService(); \$mediaProperty = \$schemaDefinition->getProperty('media'); \$service->isRelational(\$mediaProperty); if (\$service->getRelationType(\$mediaProperty) === Relation::TYPE_ONE_TO_MANY_COMPOSITION) { ... }</pre>			
The API above can still change. Besides that Extbase DataMapFactory could be considered as foundation as well.
