

TYPO3 Core - Epic #85026

Merge ext:saltedpasswords into core

2018-05-16 15:15 - Christian Kuhn

Status: Closed	Start date: 2018-05-16
Priority: Should have	Due date:
Assignee:	% Done: 100%
Category:	Estimated time: 0.00 hour
Target version: 9 LTS	
Sprint Focus:	
Description <p>The saltedpasswords extension is mandatory since 6.2. Extension core has a dependency to saltedpasswords, a working TYPO3 core can't be achieved without having ext:saltedpasswords next to it. With ext:core being the most basic TYPO3 framework extension, it does not make much sense to have a second extension that is needed by ext:core.</p> <p>Goal of this epic is to modernise ext:saltedpasswords and getting its main salt classes merged into ext:core as a set of framework classes for salted password handling and storage within the core extension directly.</p>

Revision 12f69be4 - 2018-05-17 10:47 - Christian Kuhn

[TASK] Remove saltedpasswords FE.enabled

Manually configuring clear-text password storage in TYPO3 for frontend users by explicitly setting the ext:saltedpasswords extension configuration "FE.enabled = 0" has been a bad idea for a very long time already. The feature has been dropped for backend users in core v6.2 and is now finally dropped for frontend users with this patch, too.

No third party service must rely on clear-text password storing in 2018 anymore, the TYPO3 authentication services provide an API to process credentials upon user login for authentication and authorisation purposes.

Revision 8fe2daad - 2018-08-14 06:18 - Christian Kuhn

[TASK] Merge EXT:saltedpasswords into EXT:core

Move all classes and other resources from EXT:saltedpasswords to EXT:core.

Classes live in TYPO3\CMS\Core\Crypto>PasswordHashing. This namespace will be clean in v10 when the classes that are currently only kept for backwards compatibility are removed.

The documentation has been integrated into the "Core API" docs at <https://docs.typo3.org/typo3cms/CoreApiReference/stable/ApiOverview/PasswordHashing/>
