Description

Fetching of the translated MM relation needs to be covered with functional tests.

We already have tests for FAL in

typo3/sysext/extbase/Tests/Functional/Persistence/TranslatedContentTest.php

We can extend the test covering existing relation to categories which is an MM relation configured as select (tree) field.

The categories field is configured in tt_content like:

```
'categories' =>
array (
    'exclude' => true,
    'label' => 'LLL:EXT:core/Resources/Private/Language/locallang_tca.xlf:sys_category.categories',
    'config' =>
array (
    'type' => 'select',
    'renderType' => 'selectTree',
    'foreign_table' => 'sys_category',
    'foreign_table_where' => ' AND sys_category.sys_language_uid IN (-1, 0) ORDER BY sys_category.sorting ASC',
    'MM' => 'sys_category_record_mm',
    'MM_opposite_field' => 'items',
    'MM_match_fields' =>
array (
    'tablenames' => 'tt_content',
    'fieldname' => 'categories',
    ),
    'size' => 20,
    'maxitems' => 9999,
    'treeConfig' =>
array (
    'parentField' => 'parent',
    'appearance' =>
array (
    'expandAll' => true,
    'showHeader' => true,
    'maxLevels' => 99,
    ),
    ),
    ),
    ),
    ),
),
```
