[FEATURE] Add hooks for DatabaseRecordList CSV actions

Now it is possible to customize the csv output in the DatabaseRecordList with a hook.

The following two hooks were implemented:

- customizeCsvHeader for the header
- customizeCsvRow for a single row

Resolves: #85590

Releases: master

I just tried to use these hooks in 9.5.22 and they seem to have no effect at all. I even set a breakpoint in the TYPO3 Source Code in `\TYPO3\CMS\Recordlist\RecordList\DatabaseRecordList::renderListRow($table, $row, $cc, $titleCol, $thumbsCol, $indent = 0)` before line 1546 before the hook `customizeCsvRow` should be processed. This code seems never to be reached when exporting CSV data in list module in single table view. Even when I removed all source code from method `renderListRow()` for testing purposes, the list module still renders its record tables and the CSV export in the single table view of the list module still exports CSV data. So is this functionality broken or just not used at all?
