[FEATURE] Make site title configurable per website language

The site title can now be configured with the site module instead of using the sys\_template record. If you don't need localized site titles you can also set the title on a site base.

The site title in the sys\_template record is deprecated now and will be used as a fallback in v10.

Resolves: #85592

Releases: master

+1

To be honest, from my perspective, the site configuration is the perfect place for a siteTitle (and many other fields on the project specific level, too)
