[TASK] Enable acceptance tests again

Bring back backend acceptance test execution as pre-merge and nightly tests. They are hopefully more stable now and we'll test if they survive the hard pre-merge load without being too flaky.

The patch changes the bamboo plan specs accordingly but disables a couple for FormEngine related detail tests that need further investigation.

The patch also fetches a new patch level of testing-framework to have proper ac path definition of the ac splitter script:

```
composer update typo3/testing-framework
```
