<b>Description</b>			
<p>The RuntimeCacheWriter misuses the TYPO3 Caching Framework to provide InMemoryLogging for the AdminPanel. Instead of having a generic LogWriter in the LoggingFramework this belongs scope-wise to the admin panel and implementation wise separated from the CachingFramework.</p> <p>The RuntimeCacheWriter should be deprecated and the AdminPanel should use custom log writers on demand when they will become necessary.</p>

[TASK] Deprecate RuntimeCacheWriter

The RuntimeCacheWriter was introduced for the AdminPanel, but the concept has flaws and there are better and cleaner ways to achieve the wanted behavior. Therefore, the RuntimeCacheWriter has been deprecated.
