Revision 2f3577d7 - 2018-08-01 20:51 - Helmut Hummel

[BUGFIX] Correctly render language fields of sys_file_metadata

This reverts commit 1a74c8c9d302958dd17b6a35c03e185f13811c4b ("[BUGFIX] Correctly reference sys_file_metadata.language in TCA"), that replaced the rendering of sys_language_uid and l10n_parent with the file language field, which was since then rendered twice.

We now correctly render the hidden language palette in the general tab and remove the language tab, which was empty after the palette has been hidden.
