[TASK] Correctly initialize environment for DataHandler in tests

Since importing data scenarios in tests relies on DataHandler, it is required to correctly initialize \$GLOBALS['LANG'] as well. Since not all tests were failing, this probably points out side effects during test execution in terms of reusing globals settings of other tests.

Besides that, a misbehavior in typo3/testing-framework lead to the situation that not all entities have been created - which would have triggered DataHandler log entries that rely on previously mentioned \$GLOBALS['LANG'] instance.

Resolves: #85814

Releases: master
