Description

Hello Core Team,

I'm just trying TYPO3 9.4.0-dev and started with an empty page-tree. I have created the first page and clicked on it, which results in Error:

```
#1534710048: No pseudo-site found in root line of page 3
```

Backtrace:

```
TYPO3\CMS\Core\Exception\SiteNotFoundException thrown in file
/Users/froemken/htdocs/typo3_src/typo3/sysext/core/Classes/Site/PseudoSiteFinder.php in line 177.

33 TYPO3\CMS\Core\Site\PseudoSiteFinder::getSiteByPageId(3, array)

/Users/froemken/htdocs/typo3_src/typo3/sysext/core/Classes/Routing/SiteMatcher.php:
00168:        } catch (SiteNotFoundException $e) {
00169:            // Check for a pseudo / null site
00170:            return $this->pseudoSiteFinder->getSiteByPageId($pageId, $rootLine);
00171:        }
00172:    }

Revision c22ed2aa - 2018-08-27 21:15 - Christian Kuhn

[TASK] Remove site caches if page is created on top level

The patch fixes a fatal php scenario if a page is created
on root level. The data handler now flushes site caches if that
happens and unsets the SiteMatcher singleton so it is forced
to be recalculated if re-used in current request.

Revision 5335d9aa - 2018-11-15 15:01 - Steffen Dietrich

[BUGFIX] Remove caches if a site is deleted

This patch fixes a pseudo-site-error in the backend after a
created site is deleted and the page module is shown.
After deleting the site the cache gets automatically cleared.

History

#1 - 2018-08-27 08:33 - Stefan Froemken

There is no Site Configuration configured.
Site Configuration has found my Page UID 3 and gives me a button "Add site configuration for new site".

#2 - 2018-08-27 09:24 - Stefan Froemken

I have debugged that error a little bit. TYPO3 has found an old config.yaml in typo3conf./sites/fds/. After deleting it and clearing all caches it works.
Would be cool if TYPO3 will not respect that old file or throws an error that old config does not match page-tree.

Stefan

#3 - 2018-08-27 12:13 - Christian Kuhn

that's a cache issue. i have a partial patch pending for this already with https://review.typo3.org/#/c/58017/ - the fatal is still thrown, but the next class
is ok at least. i'm still in contact with benni on how to fix this in a better way.

I also can reproduce the error in 9.5.1.
If I move this 'error'-site in an another root site tree and add pages, the error is gone. The error message is a bug

#13 - 2018-11-13 20:53 - Oliver Hader

@AndreasSteiger: What's the stack track for the exception you get (probably you might want to enable debug context in install tool)?

#14 - 2018-11-14 14:11 - Steffen Dietrich

I could reproduce the error with creating and deleting sites. There's a bugfix available that could do the trick.
