[BUGFIX] Avoid database upgrade failures when adding slug field

When upgrading with e.g. MSSQL it should be noted, that the pages.slug DB field should be a varchar database field (instead of "text"), which can be null, allowing the field to be created when upgrading an instance, without having the upgrade wizard run yet.

So all slug fields are set to null, and can be omitted correctly.

Resolves: #86116
Releases: master
