Description

When editing a new created page in workspace, editing is not possible - throws error *No pseudo-site found in root line of page [n]*

Reproduce:

- enable workspaces and create one for draft
- switch to draft workspace
- create new page in rootline, outside of any existing page tree or site configuration
- edit this newly created page (context menu in pagetree or any other edit button in list view)

Expect:

- Frame with form for page properties will open to start editing

Result:

- Error *No pseudo-site found in root line of page* returned

Revision b3c17046 - 2019-01-16 08:02 - Benni Mack

[BUGFIX] Fix various "No pseudo-site found in root line of page" errors

Fixes workspace resolving etc.

The lempy statement is wrong as a string value "0" would not expect the right return. This fixes the detection of l10n_parent.

Also check for sys_language_uid, too, to get the pid of the record instead of its parent.

This also fixes opening categories (sys_category) when using EXT:news, which calls this condition in TCA:

```
'displayCond' => 'USER:' . \TYPO3\CMS\Core\Compatibility\  
PseudoSiteTcaDisplayCondition::class . '->isInPseudoSite:pages:false',
```

Check array index exists in SiteResolving.

- Related to Bug #85985: Error: No pseudo-site found in root line of page 3 added

#2 - 2018-09-12 16:37 - Susanne Moog

- Target version set to 9 LTS

#3 - 2018-09-12 21:55 - Susanne Moog

- Status changed from New to Accepted

Background:

PseudoSiteFinder queries in \TYPO3\CMS\Core\Site\PseudoSiteFinder::getAllRootPagesWithoutSiteConfiguration for all pages with is_siteroot and pid 0 - pid 0 in this case filters the first draft version of the record in workspace (as that has pid -1) and the used FrontendWorkspaceRestriction then filters the NEW PLACEHOLDER (which has pid 0). Maybe this can be fixed by including the placeholders, but I'm unsure of possible side effects.

I tried to come up with a solution and it's working so far....but I m not sure if it's the best way for solving this problem.
