Having the very same issue.

Besides opening "Files module" folder tree shows up only after second click on the module icon, before that it's just blank.  
Safari: 12.0.2 (14606.3.4)

1. After Shift-Reload icons show up, folder tree problem remains.
2. After closing and opening Safari and logging in the icons are gone again.

It seems a general problem about font loading - also the SourceSansPro font seems not loading

I've been able to re-gain the fontawesome icons with

- open development tools
- open "network" tab
- click on "ignore cache of resources when loading resources"
- reload

but after closing and reopening Safari again, the font was gone again.

Maybe it's the same issue? <https://github.com/doanythingfordethklok/safari-cache-bug>

##### #5 - 2019-05-20 23:48 - Riccardo De Contardi

- Status changed from Needs Feedback to New

Still present (Safari 12.1 (14607.1.40.1.4))

##### #6 - 2020-01-31 12:15 - Riccardo De Contardi

I can still reproduce this issue with Safari 13.0.5 (14608.5.12)

@Riccardo De Contardi if I clear the cache like here <https://github.com/doanythingfordethklok/safari-cache-bug> it works.

Yes, Alexander, but it is just a palliative: when you quit the browser and open it again the issue will come out again (As I wrote on my comment 3)

**#11 - 2020-03-30 11:29 - Georg Ringer**

- Sprint Focus set to Needs Decision

**#12 - 2020-03-30 15:25 - Georg Ringer**

- Status changed from Needs Feedback to Rejected

closed as nothing we can really do about it. please contact me or Riccardo on slack if you got a different opinion
