Description

In order to be safe when fixing extbase and document current behaviour we need more tests covering e.g.

- how queries behave when we switch overlay mode or languages
- how does findByUid behaves when changing language
- what uid and _localizedUid is returned
- what happens to relations (select, group, mm, inline) when fetching translated records

[TASK] Provide more tests for Extbase rendering in languages

Some tests are just documenting current, buggy behavior.
So once bugs are fixed assertions needs to be updated.
See inline comments for details (and list of related issues below).
