

TYPO3.Fluid - Bug #8648

format.crop ViewHelper should support all features of the crop stdWrap function

2010-07-04 13:16 - Bastian Waidelich

Status:	New	Start date:	2010-07-04
Priority:	Should have	Due date:	
Assignee:		% Done:	0%
Category:	ViewHelpers	Estimated time:	0.00 hour
Target version:			
Has patch:	No		
Description			
Right now the format.crop ViewHelper only works partly in BE mode (v4) and is missing some features in v5. Also it can't handle HTML content correctly yet. All implementations should support the same feature set.

v4-implementation uses features from tslib_cObj, the v5-implementation substr currently. So that's why the CropProcessor would be needed here.
