

TYPO3 Core - Bug #86687

Translated record duplicated when copied (multi-selection mode)

2018-10-18 18:04 - Philipp Seiler

Description			
<p>When I use the <i>multi-selection mode</i> of the clipboard with a record (sys_language_uid = 0) and its translation selected, then translated records will show up multiple times in the clipboard. This problem does not occur, when the <i>single record mode</i> or the copy button next to the record in the list is used.</p> <p>When inserting the copied records into a new sysfolder (<i>multi-selection mode</i>), duplicates of the translations will be created.</p> <p>Problem seems to be in <code>\TYPO3\CMS\Backend\Clipboard\Clipboard->getContentFromTab()</code>, where for every record an entry in the clipboard is made. First the root-item will be added. This will also add the translated record to the clipboard via <code>\$this->getLocalizations(\$table, \$rec)</code>. After that, the translated record from the <i>multi-selection mode</i> is added again, leading to duplicates.</p>
