Description

I want to use the **description** property for TCA type "slug" in an own extension, but it is not shown. Example code:

```
'path_segment' => [  
    'label' => 'Path segment',  
    'description' => 'Description of path segment',  
    'config' => [  
        'type' => 'slug',  
        'generatorOptions' => [  
            'fields' => ['title'],  
            'fieldSeparator' => '/',  
            'prefixParentPageSlug' => false,  
        ],  
        'fallbackCharacter' => '-',  
        'eval' => 'uniqueInPid',  
    ],  
],
```

I want to give the editors some hints about the usage (e.g. not to change it without using a redirect from the old site), so a description would be very helpful.

Revision bf961f42 - 2018-10-25 11:16 - Georg Ringer

[TASK] Allow rendering of description for InputSlugElement

The description must be available for the InputSlugElement as well to give editors an additional guidance.

Resolves: #86720
