

## TYPO3 Core - Bug #86922

### Save modal does not appear for some input types

2018-11-14 08:19 - Daniel Siepmann

<b>Description</b>	
How I reproduce this:  1) Add new Content Element "Menu > Pages" 2) Select a page through wizard. 3) Click "View"  The modal is not shown. The preview is opened in a new tab. The form is submitted. The record is not saved but still "NEW" in the bottom right corner.  You can repeat as long as you want, the record is not saved, nor a modal is shown.  Until you fill in something within "header" click on "View". Afterwards you can remove the value from "Header" and it works as expected.  I can reproduce this with the above field and flexforms.

### History

#### #1 - 2019-05-13 08:45 - Frank Naegler

- Status changed from New to Needs Feedback

[Daniel Hinderink](#) I can't follow your description, can you please describe the click path better or check if this issue still exists? I don't understand in which cases the error occurs.

#### #2 - 2019-08-22 18:33 - Riccardo De Contardi

- Status changed from Needs Feedback to Closed

No feedback since the last 90 days => closing this issue.

If you think that this is the wrong decision or experience the issue again and have more information about how to reproduce your problem, please reopen it or ping me.

Thank you and best regards

#### #3 - 2019-08-23 09:36 - Daniel Siepmann

That was fixed with 2019-08-07 7b4744a8d7 [BUGFIX] Mark fields as changed after updating value via ElementBrowser (thanks to Andreas Fernandez) :) Thanks.
