Category:	File Abstraction Layer (FAL)	Estimated time:	0.00 hour
Target version:		Complexity:	
PHP Version:		Sprint Focus:	
Tags:	metadata, permissions		
Description			
To be more flexible with permissions to edit meta data of files, we need to add it to the permission list, so that it can be configured per user, storage and file mount.			
To proceed, fix for #65636 needs to be merged first
