Revision 9131af8d - 2019-04-28 17:10 - Mathias Brodala

[FEATURE] Send plaintext and HTML multipart mails

Now by default, mails sent with the EmailFinisher contain both a plaintext and an HTML part. The latter can be controlled with the new "addHtmlPart" option which is enabled by default.

The former "format" option is removed from the backend UI and migrated to the new "addHtmlPart" option.

Resolves: #87200

Releases: master

Actually it does not make sense to send **only** HTML so I'd propose the following change:

1. Always render and send HTML and plaintext parts with the mail
2. Add a new plaintextOnly option to send only a plaintext mail
3. Deprecate the current format option and migrate to plaintextOnly on the fly

Only sending a plaintext-only mail has benefits given that it can be displayed and processed just fine everywhere. It also helps to increase security given that there is no way to inject malicious code or phishing links. The same cannot be said about a HTML-only mail.
