

TYPO3 Core - Bug #87348

Task group is lost when task is executed

2019-01-07 12:01 - Christian Toffolo

Status:	Closed	Start date:	2019-01-07

Description

"Task group" is a data serialized in `serialized_task_object` (`taskGroup`) but it's also duplicated as field `task_group` in table `tx_scheduler_task`.
(like other data in this table)

In this case the task group is lost on execution of the task itself.

Better not duplicate data saving it both as field and as serialized inside a blob field.

- Status changed from New to Needs Feedback

Hey Christian,

does this happen on every task or a custom task by a third-party extension?

Thanks for your feedback.
Benni.

#2 - 2019-04-23 08:30 - Christian Toffolo

Hello Benni,
it happens in every task.

- Target version changed from next-patchlevel to Candidate for patchlevel

#4 - 2020-03-07 15:38 - Susanne Moog

I cannot reproduce this issue, do you have any special task configuration / database or anything else that might influence this?

#5 - 2020-07-05 12:28 - Riccardo De Contardi

- Status changed from Needs Feedback to Closed

No feedback since the last 90 days => closing this issue.

If you think that this is the wrong decision or experience the issue again and have more information about how to reproduce your problem, please reopen it or open a new issue with a reference to this one.

Thank you and best regards
