[!!!][TASK] Drop PATH\_thisScript constant

The patch removes the definition of constant PATH\_thisScript.

- The main change in SystemEnvironmentBuilder splits method definePaths() into two parts calculateScriptPath() and calculateRootPath() since definePaths() formerly communicated the script path using the PATH\_thisScript constant to method initializeEnvironment(), which has to fall now. Note initializeEnvironment() is now protected, which is ok since that usage was only internally for the testing framework which is resolved now, too.
- A raise of the testing framework from 5.0.1 to 5.0.2 is needed. It also defined that constant and triggered some different code paths with this in SystemEnvironmentBuilder.  
composer require --dev typo3/testing-framework ~5.0.2
- With the changes in SystemEnvironmentBuilder, Environment::getCurrentScript() now returns '../bin/phpunit' and not '../typo3/index.php' in unit tests, which is more correct. This however has the side effect that various path related unit tests need an adaption to properly set up the environment as needed.
