Category: Security	Estimated time: 0.00 hour
Target version: 12 LTS	Complexity:
PHP Version:	Sprint Focus:
Tags:	

Description

In order to monitor CSP violations or misconfigurations and according reporting endpoint has to be integrated.

Documentation:

- <https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/Content-Security-Policy/report-to>
- <https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/Content-Security-Policy/report-uri> (deprecated, but still supported & used)

Details of mismatches shall be collected and stored in an according log, containing:

- date + time
- remote address (probably configurable concerning GDPR)
- user session related information (probably configurable concerning GDPR)
- violation event (<https://www.w3.org/TR/CSP2/#firing-securitypolicyviolationevent-events>)

Concerning GDPR it has to be considered that logging also might be used to analyse security incidents which makes it valuable to store additional information like IP addresses.

History

#1 - 2019-01-13 11:44 - Oliver Hader

- Assignee deleted (Oliver Hader)

#2 - 2021-11-17 21:42 - Oliver Hader

- Target version changed from Candidate for Major Version to 12 LTS

#3 - 2021-11-17 21:42 - Oliver Hader

- Status changed from New to Accepted
