

TYPO3 Core - Bug #87453

Contextmenu with left click can only be triggered via exact hover on a svg path

2019-01-15 23:09 - Josef Glatz

Description	
Problem/Description	
It is possible to trigger the contextmenu of a pagetree item via the click on the icon of the element with a left mouse click. Since the rewrite of the pagetree, this feature feels buggy. This is only because of the fact, that the tooltip and the contextmenu via left click does only work if the cursor is exactly above a svg path/element of the inline placed icon.

[BUGFIX] Make context menu icon in SVG tree better clickable

This change adds a <rect> element inside the icon group for making the icon better clickable.

Resolves: #87453

Resolves: #93284

Can this also be related to [#88160](#)?

This is indeed an annoying thing. The context menu in the page tree can be triggered on two ways:

- Left click anywhere on the page (icon and title)
- Right click on the icon

With right clicking the icon the click only works when you are above the svg path. If you are in a transparent part (not a svg path), the click does not work.
