Description			
If you do			
10 = TEXT			
10.value = English			
10.lang.de = German			
this does not work, as this still relies on ugly TypoScript settings.

Revision b898fc08 - 2019-02-15 10:14 - Benni Mack

[BUGFIX] Have stdWrap.lang use Site concept

When building TypoScript like this:

```
10 = TEXT
10.value = English
10.lang.dk = danish
```

This does not work currently as it relies on "config.language". This part has been forgotten while the Site Handling was initially implemented into the TYPO3 core.

The patch adapts the changes to make use of Site Handling if it is available, but falls back to the TypoScript options (for PseudoSites).

Resolves: #87712

Releases: master, 9.5

Hi Benni,

your Patch ist not working with this example:

```
10 = TEXT
10.value = german
10.lang.en = english
```

In your patch you use
`$currentLanguageCode = $siteLanguage->getTypo3Language();`

but for "en" this code give back "default"

maybe you can use
`"$siteLanguage->getTwoLetterIsoCode()"`

?

Best Regards
Sven

#5 - 2019-02-14 17:28 - Benni Mack

hey Sven,

good question. Before, this TypoScript option was set to `config.language = default` (= loading XLF files with "default" language), so `config.language = en` was wrong actually as "en" never existed, so it "fell back" to default.
