Description	
Unicode characters like chinese ones cannot be used as entry point in site configurations	
How to reproduce (TYPO3 9.5.5)	
<ul style="list-style-type: none">• Create a root page• Add a site configuration for this page• Set as entry point a string with Chinese characters, like /test-[]• Try to access the page in the browser• A 307 redirect is triggered to the last site configuration available

Revision 11292caf - 2019-03-13 06:20 - Benni Mack

[BUGFIX] Allow umlaut domains for site domain resolving

As umlaut domains require to be puny-coded, this needs to be added into the request context of the SiteMatcher.

A polyfill package "symfony/polyfill-intl-idn" is installed to ensure that the methods exist at all times. If "ext-intl" is not available, the polyfill package is used.

Installed via
composer require symfony/polyfill-intl-idn

Hey Marcel,

can you quickly check if this worked with v9.5.4?

Also, can you share your site config.yaml file?

#3 - 2019-03-05 15:22 - Marcel Macasso

Hi,

it also doesn't work in 9.5.4.

this is the site configuration that I use:

```
rootPageId: 1537
base: /test-[]
baseVariants: { }
languages:
-
  title: English
  enabled: true
  languageId: '0'
  base: /
  typo3Language: default
  locale: en_US.UTF-8
  iso-639-1: en
  navigationTitle: ''
  hreflang: ''
  direction: ''
  flag: global
errorHandling: { }
routes: { }
```

#4 - 2019-03-07 21:59 - Dieter Porth

I got a related problem to this. (TYPO3 9.5.5)
If i use
base: <https://www.düddelei.de/>
then the menu-processor throws an exception and I could not get an menu.
If i use
base: <https://www.xn--dddelei-n2a.de/>
then i would get a menu-array from the dataprocessor.

Hey Dieter,

could you put in the exception here?
