

TYPO3 Core - Epic #87878

Allow full replacement of filelist module / uninstalling of EXT:filelist

2019-03-11 12:21 - Susanne Moog

Status:	Rejected	Start date:	2019-03-11
Priority:	Should have	Due date:	
Assignee:	Susanne Moog	% Done:	100%
Category:	File Abstraction Layer (FAL)	Estimated time:	0.00 hour
Target version:	Candidate for Major Version		
Sprint Focus:			
Description			
To allow replacing the current filelist module or uninstalling the whole module a few cross-dependencies have to be resolved first.			
In general, uninstalling is possible as the filelist module only provides views/add-ons to the core functionality - the lowlevel file handling is already part of core.			
When uninstalling, the following functionality will be gone:			
- filelist module - context menu on sys_file, sys_file_storage			
Subtasks:			
Task # 87879: Move flexform labels of core flexform from filelist to core			Closed
Task # 87880: Resolve dependency of FormEngine and FilelistLocalisation			Closed
Task # 87881: Make filelist uninstallable (remove ["protected": true] from composer.json)			Rejected
Task # 87882: Move backend/Controller/File to filelist extension			Closed

Associated revisions

Revision 8f6b61da - 2019-03-13 18:20 - Susanne Moog

[TASK] Remove loading of FileListLocalisation in FormEngine

The FileListLocalisation requirejs module has been removed from FormResultCompiler. The module is used for displaying translation toggles in the file list module (and only there).

Revision bcae19b4 - 2019-03-15 13:30 - Susanne Moog

[TASK] Move filelist related controllers to filelist

The following controllers have been moved to filelist as they are part of filelist functionality and not called anywhere else:

- `CreateFolderController`
- `EditFileController`
- `FileUploadController`
- `RenameFileController`
- `ReplaceFileController`

In addition the TypeScript module `RenameFile` has also been moved to EXT:filelist.

The base file function route `tce_file` has not been changed.

Revision 2d833568 - 2019-03-15 16:20 - Susanne Moog

[TASK] Move language labels to correct extension(s)

The filelist module contained labels solely used in different extensions, for example "sys_file_storage.*" labels which was only used by the `core` extension. Those labels have been moved to their corresponding parent extension.

This patch is a prerequisite for making filelist uninstalleable and part one of decoupling the filelist module. For more information see the Epic.
