Description			
The FormResultCompiler uses the FileListLocalisation module from filelist extension, regardless of whether or not any relevant items are currently rendered:			
<pre>\$pageRenderer->loadRequireJsModule('TYPO3\CMS\Filelist\FileListLocalisation'); in Packages\TYPO3\CMS\typo3\sysext/backend/Classes/Form/FormResultCompiler.php</pre>			
This should be solved either by integrating the functionality if needed in backend js or as hook - provided in addition - by the filelist module.

Revision 8f6b61da - 2019-03-13 18:20 - Susanne Moog

[TASK] Remove loading of FileListLocalisation in FormEngine

The FileListLocalisation requirejs module has been removed from FormResultCompiler. The module is used for displaying translation toggles in the file list module (and only there).
