Description			
Hello Core-Team,			
I'm just playing around with Ajax based Fluid Widgets. When I create an URI with f:widget.uri the URI was builded correctly, but if you visit the Link, you will get following error message:			
Invalid configuration: "vendorName" is not set			
Please have a look into WidgetContext.php. You will see that there is no method for vendor. So vendor was not stored into session and is not available while executing the AjaxCall.

Revision 60dcf280 - 2019-12-14 14:22 - Stefan Froemken

[BUGFIX] Add VendorName to Fluid Ajax WidgetContext

As VendorName is required to execute Extbase calls,
we add VendorName in Fluid Ajax calls, too.

Resolves: #88149
Releases: 9.5, 8.7

- File `ajax_widget_test_1.0.0_201911061019.zip` added

Hello Testers,

for better understanding I have created a little test extension for you. Install it, add it as plugin to your site and click the link in Frontend

Stefan

Currently I solved it that way, which is not very nice:

```
fluidAjaxWidgetResponse.10.vendorName = JWeiland
```
