Description			
Hi all,			
I want to set the page title to a string which contains quotation marks.			
...			
<pre><head> <title>Hotel xy "Single Room"</title> </head> ...</pre>			
According to W3C Validator, it's allowed to have quotation marks in the title tag.			
I set the title via the PageRenderer class of the core extension (\TYPO3\CMS\Core\Page\PageRenderer->setTitle). But the quotation marks will be escaped: The PageRendererClass always escapes the title via htmlspecialchars().			
For example in the getPreparedMarkerArray method:			
'TITLE' => \$this->title ? str_replace(' ', htmlspecialchars(\$this->title), \$this->titleTag) : ",			
What are your thoughts?			
Kind regards, Michael

According to W3C Validator, it's allowed to have quotation marks in the title tag.

I set the title via the PageRenderer class of the core extension (\TYPO3\CMS\Core\Page\PageRenderer->setTitle).
But the quotation marks will be escaped: The PageRendererClass always escapes the title via htmlspecialchars().

For example in the getPreparedMarkerArray method:

'TITLE' => \$this->title ? str_replace('|', htmlspecialchars(\$this->title), \$this->titleTag) : ",

What are your thoughts?

Kind regards,
Michael

Sorry guys,
it was a mistake by myself.
My custom viewhelper escaped the content and therefore
it was a double escaping problem.
The issue can be closed.

Cheers,
Michael
