

## TYPO3 Core - Bug #88306

### CKEditor not loading since 9.5.6

2019-05-08 17:45 - Jeff C

<b>Description</b>	
We just updated to Typo3 9.5.6.	
Custom RTE fields are now rendered as simple textareas without RTE and without error message.	
Things get clearer when we try to use our custom RTE-YAML-definition. The YAML definition wants to import base functionalities of the CKEditor extension. This creates this error message:	
<pre>#1485784246 RuntimeException YAML File "EXT:rte_ckeditor/Configuration/RTE/Processing.yaml" could not be loaded</pre>	
Could this be due to the new security features?

##### #2 - 2019-05-08 18:18 - Josef Glatz

- Status changed from New to Needs Feedback

#### Hi Jeff, thank you for your issue!

Unfortunately, I can't reproduce your problem in two composer based TYPO3 installations running it with 9.5 master Branch `9.5.\*@dev`.

Can you give me some more details about your environment or even share some of your custom RTE presets.?

##### #3 - 2019-05-08 18:43 - Oliver Hader

- Priority changed from Must have to Should have

Jeff, did you try the usual steps like clearing caches (incl PHP's OPcache) and ensuring that the upgrade to TYPO3 v9.5.6 was successful and complete - e.g. is the according file available in typo3/sysextrte\_ckeditor/Configuration/RTE/Processing.yaml?

##### #4 - 2019-05-08 20:47 - Josef Glatz

Tried also to reproduce in different test instances with different upgrade procedures without success. .

no feedback since now. I've wrote Jeff an e-mail. If we get no feedback at all I would close the issue as I can't reproduce it. I also asked a couple of guys at the typo3camp.at where no one of them had that problems so far.

## #7 - 2019-05-23 15:28 - Tom Novotny

- Assignee set to Josef Glatz

I'd like to re-open this issue, since it's not loading on my 9.5.7 installations.  
Error in console:

```
Uncaught Error: [CKEDITOR.resourceManager.load] Resource name "default" was not found at
"https://test.ddev.local/typo3/sysext/rte_ckeditor/Resources/Public/JavaScript/Contrib/styles.js?t=J1QC".
at window.CKEDITOR.window.CKEDITOR.dom.CKEDITOR.resourceManager.<anonymous>

at HTMLScriptElement.CKEDITOR.env.ie.d.$.onerror (ckeditor.js?bust=dfa3a8a88e23a16215595742343b326855743fc2:246)
```

styles.js is requested in public/typo3/sysext/rte\_ckeditor/Resources/Public/JavaScript/Contrib/ckeditor.js:491  
Since it's missing the RTE is not being loaded.

[WIP] Collecting more details...

## #8 - 2019-06-10 21:30 - Albrecht Köhnlein

@Tom:

Do you have a valid YAML? I ran into the same error, because I not had `stylesSet` defined. After I added

```
stylesSet:
  []
```

It worked without a problem.

## #9 - 2019-06-28 08:37 - Andre Koller

I got the same Error after update from 9.5.5 to 9.5.8

```
#1485784246 RuntimeException
YAML File "EXT:rte_ckeditor/Configuration/RTE/Processing.yaml" could not be loaded
```

The solution was really simple: the Extension was uninstalled during the update :)
