TYPO3 Core - Bug #88393

Single-table mode for Page translations not possible

2019-05-20 08:02 - Josef Glatz

Description

Problem/Description

For TYPO3 editors it's somehow hard or new to work with the slug for pages. Especially for translated pages, it's actually not possible to get an overview in the listview about slugs for translations.

- An editor must always open each page translation to see the slug
- It's not possible to switch into the single-table mode view for translated pages (From a technical point of view, the current reasons are clear to me.)

ToDo(s)

- Are there any plans on improving such things in the TYPO3 backend? (Didn't find a epic issue so far)
- What about adding the slug column to the recordlist in the listview for page translations?
- Would it makes sense to make the single-table mode available for page translation recordlist?

@josef I am not sure if I understand the description here correctly.

I can click on "Page" and see the subpages **with** the translated pages **and** the slugs (if selected) - this is in TYPO3 9.

Page (17) ‹

	Page title (page hea...															[Localization]	Localize to		URL Segment
	Fach-Bachelor					i						▼	◄				🇩🇪 Deutsch		/studium/fach-bachelor
	Bachelor's Programme					i											🇬🇧 English		/students/bachelors-programme
	Zwei-Fächer-Bachelor					i						▲ ▼	◄ ►				🇩🇪 Deutsch		/studium/zwei-faecher-bachelor
	Dual-Subject Bachelor's Prog...					i											🇬🇧 English		/students/dual-subject-bachelors-programr
	Staatsexamen					i						▲ ▼	◄ ►				🇩🇪 Deutsch		/studium/staatsexamen
	Medicine					i											🇬🇧 English		/students/medicine
	Master					i						▲ ▼	◄ ►				🇩🇪 Deutsch		/studium/master

So, yeah, it is not possible to click on "Page Translations" but maybe separating "Page" and "Page translations" and showing the translations in "Page" is confusing anyway. (And maybe "Page translations" used to be separate because of page_language_overlay and should no longer be).

Apart from that, I don't think the list view is always the best option (because it does not show the full hierarchy and pages on subpages).

I think it might be a good idea to check the usability of handling slugs (and also redirects) in general and look at what workflows and overviews editors most likely need and what might be helpful.

Also, I think the "Pagetree overview" and "Localization Overview" in the INFO module are quite helpful. The "Pagetree overview" already shows a nice overview of Page title and slug (if you use "Basic settings"), **but it does not show the translated pages** . It might be nice to have an option for that.
