| Description | | | |
| TYPO3 v9.5.7 If I switch in the Backend Modul "Indexing" to "List: Pages" the attached error appears. All other possible selections are working fine. (1/1) #1476107295 TYPO3\CMS\Core>Error\Exception PHP Warning: json_decode() expects parameter 1 to be string, array given in /is/xxxxxxxxxxxxxxxx/www/typo3_src-9.5.7/typo3/sysex/indexed_search/Classes/Domain/Repository/AdministrationRepository.php line 363 Installed EXT: Bootstrap Package, News, dpn_glossary | | | |

Can you remove this index entry from the table index_phash (or truncate all indexed_search tables) and check if this occurs? I see no way how this can happen currently

#2 - 2019-06-06 09:16 - Andrea Moroni

After truncating all indexed_search tables and a re-index the error keeps occurring
Core: Error handler (BE): PHP Warning: json_decode() expects parameter 1 to be string, array given in
/is/xxxxxxx/typo3_src-9.5.7/typo3/sysex/indexed_search/Classes/Domain/Repository/AdministrationRepository.php line 363

Could it be a problem with hosteurope PHP 7.2.18-he.0 ?

#3 - 2019-06-06 11:29 - Boris Schauer

I have the same issue on another Hoster

Hi Georg.

The method addAdditionalInformation() already decoded the json, hence the array in the error message.

@see
