Description

Description:
It would be very helpful having a description of how to access form values by identifier in the documentation.

Use case:
In the SenderEmailFinisher template form values like salutation and name are used for personalized greeting.

Example:

```
Dear {form.formState.formValues.salutation} {form.formState.formValues.name},  
  
thank you for your reply.
```

Revision e7919c43 - 2021-09-02 13:12 - Bjoern Jacob

[DOCS] Access single form values

The documentation now contains a chapter which describes how to access single form values in finisher templates.

In addition the chapter "Frontend Rendering" has been rearranged. That way, the more important aspects for integrators are moved to the top.

Resolves: #88510

Releases: master, 10.4

Notice that this depends on [#84713](#), otherwise you only get raw values. For example option values instead of their labels.

- TYPO3 Version changed from 10 to 11

Tasks:

- check if this has been documented, now
- if not document it
- Liddi's example is not correct, needs proper syntax
