<b>Description</b> Create a New template record.  fill in a name - its required. Click on Close.  -> requester gives warning - OK. Save the record  (Open the Record again). In field "Include basis template" add a Record  Click on the Close button -> Even the record has been changed, the record will be closed without warning.  If the record has already a record saved, it works like expected.  Thanks for taking care about this  Christian.

### History

#### #1 - 2019-07-17 15:44 - Daniel Windloff

Can be reproduced on current master.

The column "basedOn", table "sys\_template" (type=group) does not set class "has-change" for "Browse for records" and "Add New Basis Template".

This issue

I tried the following tests on 9.5.9

### Prerequisites:

- On a sysfolder > list view > create a new template record
- Add a title ("AAAAA"), click on "Save and Close".

### Test 1

1) Open the template record "AAAAA"

1.1) Tab "Includes" > field **Include Basis Template** [basedOn] > click on the "+" icon ("Add New Basis Template") to add a new template

2) fill in a title "BBBBB" for the new created template, save and close it

2.1) Now the "BBBBB" template is listed on the list **Include Basis Template** [basedOn]

3) Click on Close

## Actual result

- The template "AAAAA" is closed
- The "BBBBB" template has been include, this means that the "AAAAA" template change has been saved without confirmation

## Expected result

- The "Do you want to close without saving?" modal should be shown

## Test 2

- 1) same sysfolder > list view > create a new template record "CCCCC"
  - 1.1) Save it and close
- 2) Open the template record "AAAAA"
  - 2.1) Tab "Includes" > field **Include Basis Template** [basedOn] > click on the "folder" icon ("Browse for records") to add an existing template
  - 2.2) Select "CCCCC"
  - 2.3) Now the "CCCCC" template is listed on the list **Include Basis Template** [basedOn]
- 3) Click on Close

## Actual result

- The "Do you want to close without saving?" modal is shown

## Test 3

- 1) same sysfolder > list view > open the template record "AAAAA"
- 2) Tab "Includes" > field **Include Basis Template** [basedOn]
  - 2.1) the list shows both "BBBBB" and "CCCCC" templates
  - 2.2) Select one of the templates
- 3) Click on the arrows icons (e.g. "Move selected items upwards") and alter the order of the templates
- 4) Click on Close

## Actual result

- The "Do you want to close without saving?" modal is shown

## Test 4

- 1) same sysfolder > list view > open the template record "AAAAA"
- 2) Tab "Includes" > field **Include Basis Template** [basedOn]
  - 2.1) the list shows both "BBBBB" and "CCCCC" templates
  - 2.2) Select one of the templates
- 3) Click on the delete icon ("Remove selected items")
- 4) Click on Close

## Actual result

- The "Do you want to close without saving?" modal is shown

## Conclusion:

- the issue only affects the "+" button ("Add New Basis Template")

### #4 - 2020-03-20 09:27 - Andreas Fernandez

- *Status changed from New to Closed*

I cannot reproduce the reported issue.

@Riccardo: You won't get a notification on close when adding a new basis template (BBBBB) because on save of that new template it's automatically assigned to AAAAA.
