Description

The PageTree overview in the info modul displays wrong values for fields. (See attached screenshot)

Extending the fieldDefinitions with "no_index" and "no_follow" of the EXT:seo, the output is "No index: yes" and "No follow: yes", even though the page is enabled for index and follow.

Might be an issue with the new TCA config "invertStateDisplay". The mod.web_info.fieldDefinitions should respect the setting of "invertStateDisplay" to display correct values for the fields.

How to produce the output (no_index,no_follow)

```
mod.web_info.fieldDefinitions {
  0 {
    label = LLL:EXT:info/Resources/Private/Language/locallang_webinfo.xlf:pages_0
    fields = title,uid,slug,alias,starttime,endtime,fe_group,target,url,shortcut,shortcut_mode,
no_index,no_follow
  }
}
```

Revision eade861a - 2020-02-18 23:35 - Christian EBI

[BUGFIX] Change no_follow, no_index labels to their new inverted labels

The fields no_follow and no_index were inverted some time ago, but still retained their previous non-inverted labels in TCA. These were not actually shown when editing a page, but could be read in by other parts of the backend.

This lead to misleading labels in both the "Display information" window as well as the "Info -> Pagetree Overview" module.

Resolves: #88812

Releases: master, 9.5

- Category changed from Backend User Interface to SEO

Seems to be a TCA issue.

Labels on tca column "no_index" and label on robots palette "No index" and "Index this page" are inconsistent.

#3 - 2020-01-03 22:57 - Riccardo De Contardi

Still reproducible on 10.3.0-dev.

As far as I can see the "wrong" labels are

```
typo3/sysext/seo/Resources/Private/Language/locallang_tca.xlf:pages.no_index  
typo3/sysext/seo/Resources/Private/Language/locallang_tca.xlf:pages.no_follow
```

and are just used here: typo3/sysext/seo/Configuration/TCA/Overrides/pages.php lines 79 and 95

I would suggest to use instead:

```
typo3/sysext/seo/Resources/Private/Language/locallang_tca.xlf:pages.no_index_formlabel  
typo3/sysext/seo/Resources/Private/Language/locallang_tca.xlf:pages.no_follow_formlabel
```

which are the ones used in the palette.

#4 - 2020-02-18 19:32 - Gerrit Code Review

- Status changed from Accepted to Under Review

Patch set 1 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.

It is available at <https://review.typo3.org/c/Packages/TYPO3.CMS/+63312>

#5 - 2020-02-18 19:33 - Christian EBI

The labels were wrong in the "Display information" window of a page as well. (for the same reasons).
