#### Description

When you alter data in a CE and leave the CE via "Close" button, it shows a modal with "You have unsaved changes, would you like to save and close, continue editing, or discard them".

However, this is not always shown.

So far I have not identify when it shows and when not, however It works on some flexform fields and on some it doesnt.

For instance the ext:news (version 7.2.0) adds a flexform field "Max width for media elements" for FE Plugin "List of selected items". If you enter data in there and decide to close the CE, it shows the modal.

If you enter data via the wizard for the field "Pageld for single news display" however, the modal is not shown and you simply silently discard the changes to the plugin - leaving the CE without saving.

So my best guess its some kind of flexform wizard thing maybe.

Tested versions:

Standard ext:news 7.2.0

TYPO3 9.5.8

nginx-fpm with php 7.2.19

So far it seems to be related only to flexform fields with a wizard like

- RTE
- PageID-Wizard
- DateTime

Is this list complete? Can anyone confirm that behavior?

In fact, the "shortcut target" mentioned on [#86611](#) is solved, the issue mentions other two places where this problem occurs:

- 1) [...] removing a record from a multi select field. E.g. wehn I remove a static template from a sys\_template record.
- 2) edit the content of some RTE text in "source code" mode and then hit close without saving
