

TYPO3 Core - Bug #88918

Create page via drag'n'drop does not respect TCAdefaults in pagets [from #25021]

2019-08-05 11:44 - Lukas Speck

Status:	Closed	Start date:	2019-08-05

Tags:	pagetree, tcadefaults		
Description			
When creating a new page via drag'n'drop in the new pagetree the configured TCAdefaults settings from pagets won't be applied to the newly created page. This bug still exists in TYPO3 v9.

History

#1 - 2019-08-05 11:49 - Lukas Speck

- Copied from Bug #25021: Create page via drag'n'drop does not respect TCAdefaults in pagets added

#2 - 2019-08-05 11:49 - Lukas Speck

- Category set to Pagetree

#3 - 2019-08-09 11:44 - Oliver Bartsch

- Status changed from New to Needs Feedback

Which fields did you set?

I'm not able to reproduce this neither in v9 nor in current master.

I used this configuration:

```
TCAdefaults.pages {
    is_siteroot = 1
}
```

#4 - 2019-08-12 11:05 - Georg Tiefenbrunn

TYPO3 9.5.x

```
# Page structure
+ Root [uid=1]
+ Sub [uid=2]
```

TCAdefaults via pages.TSconfig on page.uid=1

```
# Page TS
TCAdefaults.pages {
    is_siteroot = 1
    no_search = 1
    no_sitemap = 1
    no_index = 1
    no_follow = 1
}
```

- Does work if a new page is inserted via list module > page.uid=2 > "new record"
- Does **not** work when dragging a new page into uid=1|2

TCAdefaults via Pages.tsconfig and condition

```
# Page TS added by ExtensionManagementUtility::addPageTSConfig()  
[page["uid"] == 901]  
  TCAdefaults.pages {  
    is_siteroot = 1  
    no_search = 1  
    no_sitemap = 1  
    no_index = 1  
    no_follow = 1  
  }  
[END]
```

- Does work if a new page is inserted via list module > page.uid=2 > "new record" > direct child of page.uid=1
- Does **not** work when the new page is no direct child of page.uid=1 (if e.g. is child of page.uid=2)
- Does **not** work when dragging a new page into uid=1|2

#5 - 2019-08-27 16:07 - Eric Chavillaz

I can confirm this bug, I just set the no_search value to 1.

Thanks
