[TASK] Deprecate internal public properties of TSFE

Due to e50b1c1acdd5da514a35f837d9b853692bcfa16d the TypoScriptFrontendController requires four objects as constructor arguments while keeping maximum compatibility by fetching fallback information from the current PSR-7 object or setting data from the legacy arguments.

This allows for the following "internal" public properties

- TSFE->cHash
- TSFE->domainStartPage
- TSFE->cHash\_array

to be deprecated.

The hashParameters for calculating the hashBase have been modified:

- "cHash" has been replaced by "dynamicArguments" but contains the same values
- "gr\_list" is now called "groupIds"
- "domainStartPage" has been replaced by "site" (identifier of the site)

Resolves: #89001

Releases: master
